

*C*olour Analysis Report for Mary-Lois Wilson

By Indiana Holley

Colour Analysis Client:

Ms Mary-Lois Wilson

Skin: Golden brown

Eyes: Dark brown

Hair: Charcoal brown

The Colour Homebase Questionnaire

In the first initial consultation, Mary-Lois identified warm earthy colour tones as those in which were most flattering to her complexion.

As colours are an important aspect in what to wear, a colour analysis questionnaire was conducted to determine Mary-Lois' true natural colouring based on the pigment colours in her eyes, hair and skin tones.

Each season of spring, summer, autumn and winter has its own unique colour palette. By analysing these three natural features (eyes, hair and skin tones), I was able to determine the perfect seasonal colour palette for Mary-Lois.

At first Mary-Lois was identified as a Winter season colour, however shades such as brown, pumpkin, olive, orange and gold brought out a healthy glow to Mary-Lois' complexion confirming that she is in fact a striking Autumn with a blend of winter.

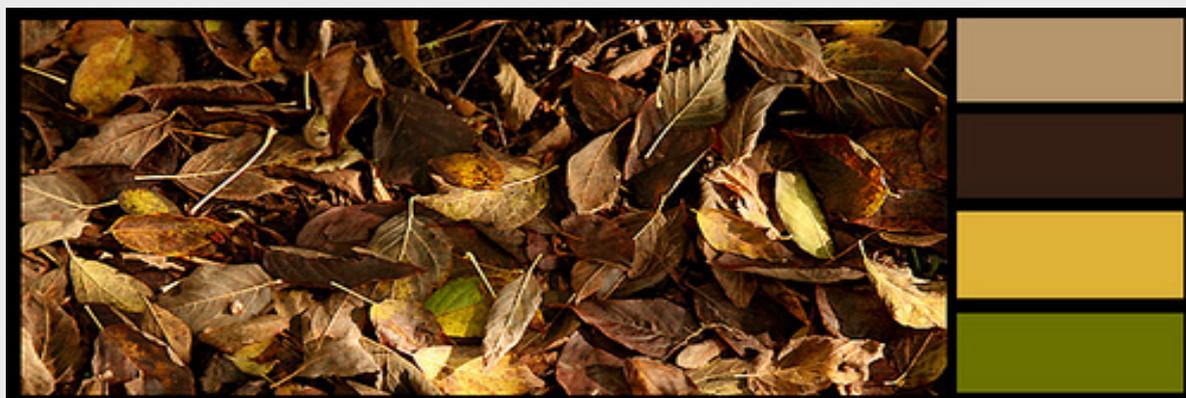

Warm Autumn

As Mary-Lois is a warm Autumn seasonal colour with a warm skin tone, Mary-Lois will need colours to enhance this warmth. To compliment her skin tone, Mary-Lois will need to wear colours that are earthy.

Autumns are all about glowing warmth and muted beauty.

An Autumn can wear colours that make you think of something exotic, spicy and mysterious with ease.

As women always look their best when they dress and coordinate their hair colour and makeup to match their season, in this report I provide recommendations suggesting a range of glorious shades that will ensure Mary-Lois looks stunning every single day.

Autumn Season Colours

Within the Autumn category of colouring, there are four sub-categories or blends including gentle autumn, golden autumn and striking autumn. As Mary-Lois has dark coloured hair, warm undertones to her skin and blends with Winter, Mary-Lois is considered a striking Autumn (warm Autumn) who requires colours to enhance this warmth.

Warm autumn colour and skin tones have a colour palette that is composed of shades. Colours in brown, tan warm beige, rust, olive green and forest green not only will look fabulous on you but can also be coordinated with virtually everything.

Mary-Lois' Colour Chart

Warm Autumn Makeup

Women always look their best when they dress and coordinate their hair colour and makeup to match their season. As grey hair comes in on an autumn, it tends to be yellow-grey and is aging rather than chic. But once an autumn's hair has turned completely grey, its overall warm tone can be most attractive on the autumn complexion.

As an autumn the clothing colours that are best with Mary-Lois' colouring are the more muted earth tones. She will need to intensify her makeup to balance strong golden undertones in her skin. A perfect person to model to achieve this look is Susan Sarandon. Here's how to get the look.

Your eye colours should be based on the eye colour and not what you are wearing, so always pick muted earth tones when selecting eye shadow colours.

To increase the intensity in an Autumn's face you need colours such as French red ,(Red Brown), Heavenly (Soft Beige neutral), Rapture (Plum Brown), Entice (Peachy Brown) & Loveable (Pink Brown).

A warm pink lip with subtle gleam works with sun-kissed skin. The results?? Totally luscious lips.

Classic Looks for a Warm Autumn

When shopping for clothes to flatter and highlight Mary-Lois' Autumn complexion, look for shades with a warm undertone that will match the glow in her skin. There are a wide variety of shades that compliment women who fall under the category of Autumn. However, there are also a number of colours that simply do not flatter Autumns and should be avoided.

As Mary-Lois is a warm autumn colour, she will want to avoid colours that are clear and bright. Typically black and white are not good Autumn colours either as it will wash her out and make her complexion appear wan.

Instead of classic black and white, choose combinations of black with taupes, creams, oyster, and beige. A look very flattering to a warm autumn colour and skin tone.

Pastels and blue tones are not good colour choices for Autumns either, as they will bring about a washed out appearance to your complexion.

When shopping for a dress or a full outfit, Mary-Lois will look warm and inviting in shades like navy blue, olives, golden browns and deep warm greys.

These colours will highlight and compliment her complexion perfectly. If a blouse is needed, never opt for one in a snowy white. Instead, choose a blouse in a more neutral shade such as oyster, ecru or eggshell.
